

# 2020 Holiday Coloring Book Project

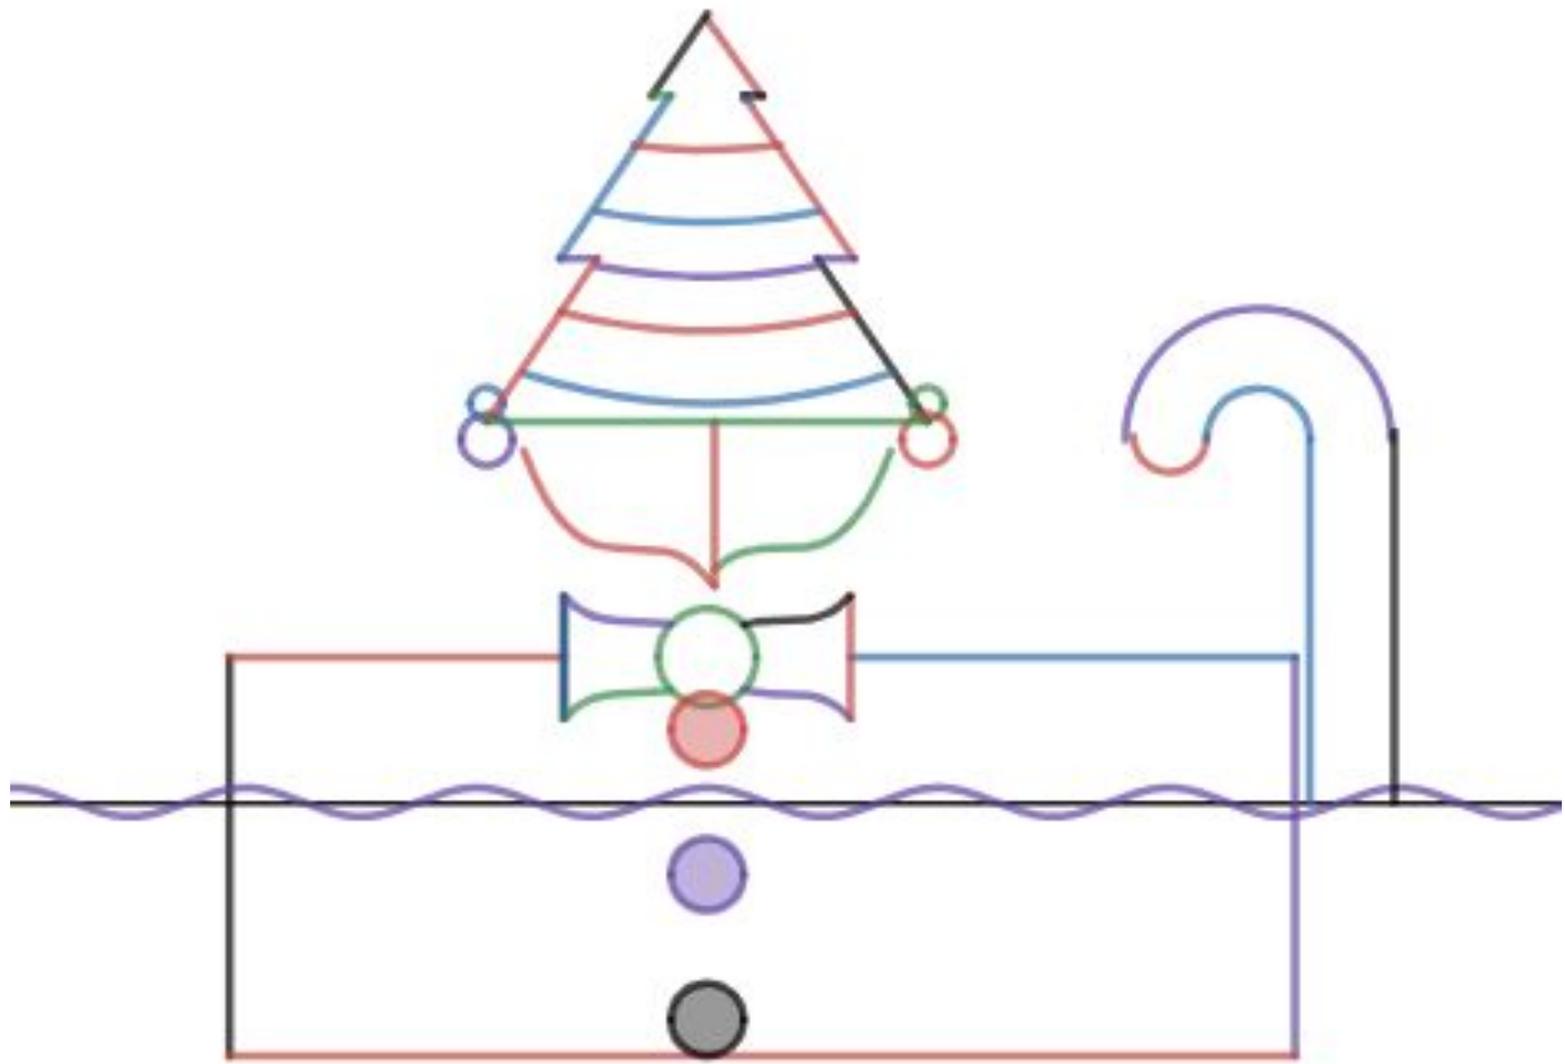

In this project, students had to demonstrate their mastery of transformations of functions by creating a holiday coloring book page, to be judged by their classmates and a 4 year old (hence some of the cartoon/dinosaur references). Their projects needed to include at least

- 1 linear function
- 1 radical function
- 1 quadratic function
- 1 polynomial function
- 1 rational function
- 1 exponential function

## ***Shonisaurus***

A fun fact about the SHONISAURUS, it is the largest extinct marine animal that has been found. It was first found in Nevada and later in British Columbia.
